Roofing

first Concept

g p L a N S

Second concept

Here are examples of the roofing designs I liked the design of the curved area so I kept it in all my plans. The first concept is similar to my final roof design and this was used as a guide. The second roof design is an example of using different shapes and angles. The curved and middle of the house plans have the roofing on the second level and the rest is connected to the existing house itself.

Final roofing
design "Sketch"...
